Qz Identify the four kinds of computer hardware with diagram and pictures?
Ans Kinds Of Compuser HARDWARE:
O MOTHER BOARD:
The motherboard is the main
Known as the main board or logic board.

gt is main circuit board in a computer that connects all the other derices together like a skeleton. 2 POWER SUPPLY UNIS (PSU): A poner supply unit (PSU) Converts main AC to low voltage regulated DC power for the internal components of a computer. Modern bersonal computers universally use a switched-mode power supply:
9t is main circuit board in a computer that connects all the other derices together like a skeletom. 2 POWER SUPPLY UNIS (PSU): A poner supply unit (PSU) Converts main AC to low voltage regulated DC poner for the internal components of a computer Modern bersonal computers universally use a switched-mode
Power Supply Unis (PSU): n A power supply unit (PSU) Converts main AC to Low voltage regulated DC power for the internal components of a computer. Modern bersonal computers universally use a switched-mode
POWER CUPPLY UNIS (PSU): A power supply unit (PSU) Converts main AC to low voltage regulated DC power for the internal components of a computer Modern bersonal computers universally use a switched-mode
POWER CUPPLY UNIS (PSU): A power supply unit (PSU) Converts main AC to low voltage regulated DC power for the internal components of a computer Modern bersonal computers universally use a switched-mode
POWER CUPPLY UNIS (PSU): A power supply unit (PSU) Converts main AC to low voltage regulated DC power for the internal components of a computer Modern bersonal computers universally use a switched-mode
POWER SUPPLY UNIS (PSU): A power supply unit (PSU) Converts main AC to low voltage regulated DC power for the internal components of a computer Modern bersonal computers universally use a switched-mode
